STEP 2 : User will be randomly shown some movies and will be asked to rate atleast 5 movies. If a user doesn't rate atleast 5 movies, he will be shown an error message to rate atleast 5 movies. To proceed to the next screen, user needs to click the button on the top left.

STEP 3 : User will be shown various genres to select from and will be shown a list of personalized recommended movies along with their predicted ratings for the movies. User can click on any movie to view the movie details.

STEP 4 : In the movie detail page user is shown following features of the movies:

- Year of Release
- Average Rating
- List of Genres

On clicking the “MORE DETAILS” button, the app will redirect the user to the IMDB page of the movie.
